

# Create Flask Project

Team ID	PNT2022TMID52244
Project Name	Smart Fashion Recommender Application

This screenshot shows the Visual Studio Code editor with the Flask application code in `app.py`. The Explorer sidebar on the left shows the project structure, including static files, templates, and a virtual environment. The main editor displays the following code:

```
1 from flask import Flask, render_template
2
3 app = Flask(__name__)
4
5 @app.route("/")
6 @app.route("/home")
7 def home():
8     return render_template("home.html")
9
10 @app.route("/login")
11 def login():
12     return render_template("login.html")
13
14 @app.route("/registration")
15 def registration():
16     return render_template("registration.html")
17
18 if __name__ == "__main__":
19     app.run(debug=True)
```

This screenshot shows the Visual Studio Code editor with the Flask application running in debug mode. The left sidebar shows the 'Variables' and 'Watch' panels. The main editor displays the same code as the previous screenshot. The bottom status bar shows the application is running on `http://127.0.0.1:5000`. The terminal at the bottom shows the following output:

```
* Serving Flask app 'app'
* Debug mode: on
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
* Restarting with stat
* Debugger is active!
* Debugger PIN: 138-298-614
